EDUCATION

Boston University, College of Engineering Boston, MA
MS, Electrical & Computer Engineering Sep 2025

- Coursework: Fabrication Technology for Integrated Circuits, Physics of Semiconductor Devices, Computational Methods in Materials Science, Electronics

University of Richmond Richmond, VA
Bachelor of Arts, Leadership Aug 2021 - May 2024

- Physics Minor, 3 Semesters on the Dean's List

SKILLS

Design: KiCad, OnShape, Autodesk Fusion

Fabrication: Silicon Processing, Photolithography, Soldering, Laser Cutter, 3-D Printing, CNC Mill

Software: Quantum Espresso, Mathematica, Matlab, Python, Excel

PROJECTS

Masters Project May 2026 - Aug 2026

- Investigated the role of static magnetic fields on optical and spin excitations in NiO
- Suggested applying Lissajous figures to help visualize procession of magnon while varying parameters
- Ran high performance computing jobs on the BU Shared Computing Cluster

High Power Buck Converter Sep 2025 - Present

- 24V 35A custom buck converter, developed schematic, tailored PCB layout, and assembled board
- Noticed previous converter was inefficient, carefully recalculated system calculations allowing for a lower current design, 20% less power consumption, and easier assembly and maintenance

EXPERIENCE

President, Electrical Team Co-Lead Sep 2025 - Present
Mars Rover Club Boston, MA

- Designed housing for PCB boards, created a customizable interface for modular attachments reducing wire clutter almost entirely, optimized wiring for optimal output and space efficiency
- Submitted to University Rover Challenge 2026, best score in Boston University history
- Oversaw BOM, ordered and received dozen of components, and managed inventory levels

Sales, Project Management May 2024 - Aug 2025
ModernfoldStyles, Inc. Moonachie, NJ

- Generated \$1.2 million in sales of office fronts and telescopic systems
- Advised in development of new modular office front offering halving onsite labor requirements
- Optimized existing products discovering redundant traveling post, noticing existing symmetric geometry allowed for cleaner corner connection and reducing part count

Intern May 2023 - Aug 2023
ZONA Glass Wall Systems Newfield, NJ

- Controlled dead inventory levels, freeing up shelving space saving upwards of 25,000 in new shelving units. Found a local recycler to dispose of thermoplastic gasket in an environmentally friendly way
- Developed guidelines to meet OSHA standards, added AEDs, and compliant documentation process
- Began patent process for new products, working with patent attorneys to explore patentability by sort through existing competitors and noticing novel application within product

LEADERSHIP & ACTIVITIES

Captain, President, Club Rugby Aug 2021 - May 2024

- Managed \$20,000 club funds account, lead campaigns to increase membership and donations
- Grew club from half a dozen members to over fifty active members and 3 nationals appearances
- Took initiative to compete in larger tournaments and travel outside of league to set up success in nationals
